

111. The perfect union of one leg or arm of some double monsters viz striking

284 - on some <sup>fertile</sup> monsters breeding, opposed to their sterility is but then it is the one perfect which breeds. - 377. Fertile generally.

356. Some the animals, like men, have numerous variations in veins.

358. monsters occur differently in number & kind in different species - a trunk sprouting common in the Pigs. - 355. in wild

(2) animals viz few monstrosities - there is evident relation between monstrosity & variation

392. again a part later formed, always must be

(2) affected & causes producing monstrosities. Extra and/or - or first formed least monstrosities - (shows most monstrosities to not come on very early)

402 on coexistence of monstrosities, without

(9) as evident relation of parts.

406. Distinction between arrest of development & (2)  
of formation

437 cases of monstrosities in man resembling

(9) Lower animals resulting from persistence  
of embryonic condition

448 - intimate parallelism between the embryonic,  
zygotical & teratological series.

456 again insists on law of number varying  
in part with numbers, & being in itself  
variable.

456 Summary on laws governing variation -  
generally rudimentary - (hence cause does not  
act very early)

462 on homologous parts uniting both in  
monstrosities & in nature. -

do not solve account for this & division  
of cells at some period of growth ??

479 - on germ being originally monstrosities.

499 arguments for monstrosities being  
produced later & 500 Rees, 503 (10)

Rey Catalogue). - 506, 7

(641)

Dom. 3)

(3)

347- shows over imagination having any effect  
on nature of monotony.

392. (2)

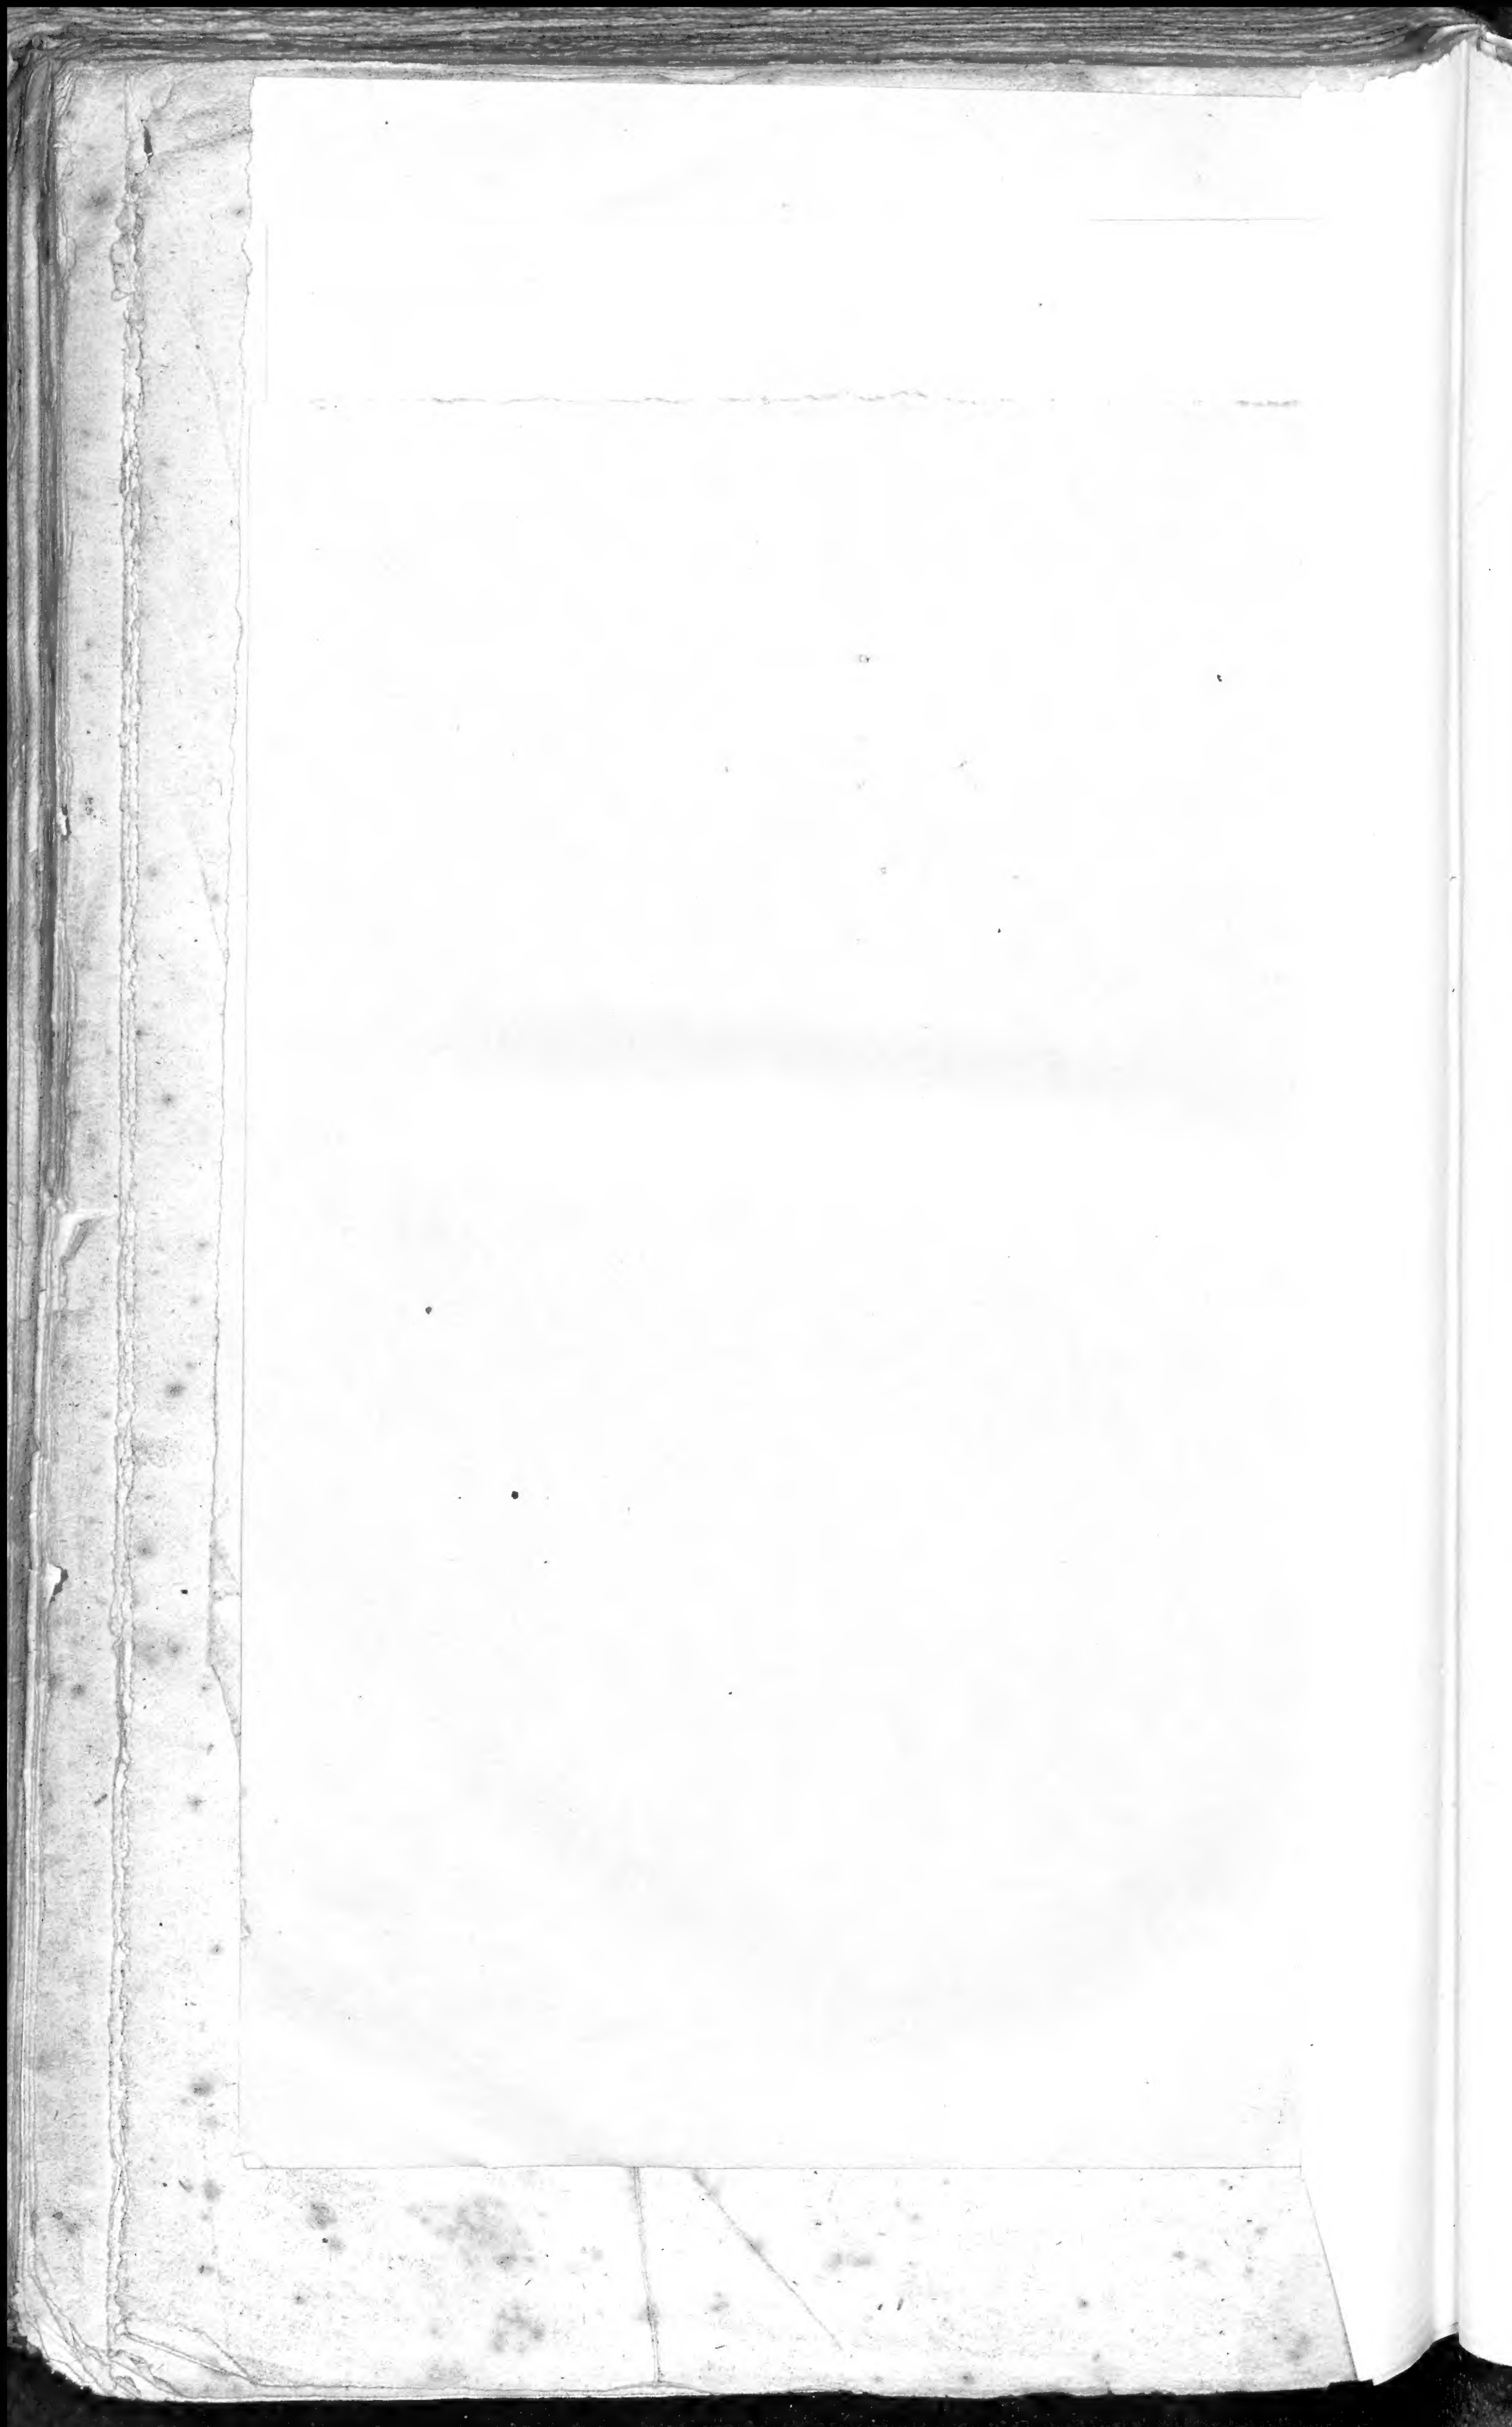

593 - summary of laws of monotony, nothing  
new

604 on parallel series in Zoology

609. good instances, showing how  
easily final cause may be  
falsely inserted.
